

※ Components Checking

LIST OF COMPONENTS:

Please double-check the components list hereinafter and contact us for any unconformities.

Remarks:

- 1, Without affecting their performing, components may be changed without notice.
- 2, Drawings for reference only.

List of Components	Qty.	List of Components	Qty.
1.Main body	1	7.Cover	1
2.Plastic guard A	1	8.Screw	1
3.Bolt A	2	9.Plastic guard B	1
4.Decorative plate	1	10.Plastic guard C	1
5.Bolt B	2	11.Allen wrench	1
6.Handle	1	12.Installation manual	1

※ Installation Instructions:

- ☆ Do not disassemble the main body, as it has been installed & commissioned correctly & precisely before leaving the factory.
- ☆ To avoid the faucet from jamming, do flush the water pipe before installation.
- ☆ After installation, make sure every joint safely sealed & no leaking.
- ☆ Using condition: Working pressure at 0.05-1.0MPa (including cold & hot water pressure) with applicable water temperature: 4°C- 90°C.
- ☆ Make sure to connect the hot/cold inlet pipe correctly, if standing in front, hot water pipe connecting to the left & cold water pipe connecting to the right.

※ Dimention Drawings

※ Installation Procedures:

<p>1.</p> <p>For wallcut space.</p>	<p>2.</p>
<p>1.Dig caves in the wall as per above dimensions.</p>	<p>2.Fix the plastic guard A(2) to the main body(1) with screw A(3).</p>

3.

3. Fix the main body(1) to the hole, then put the lever bar to the plastic guard A(2) and keep horizontal. After adjusting the position, make 4 drilling marks on the wall.

4.

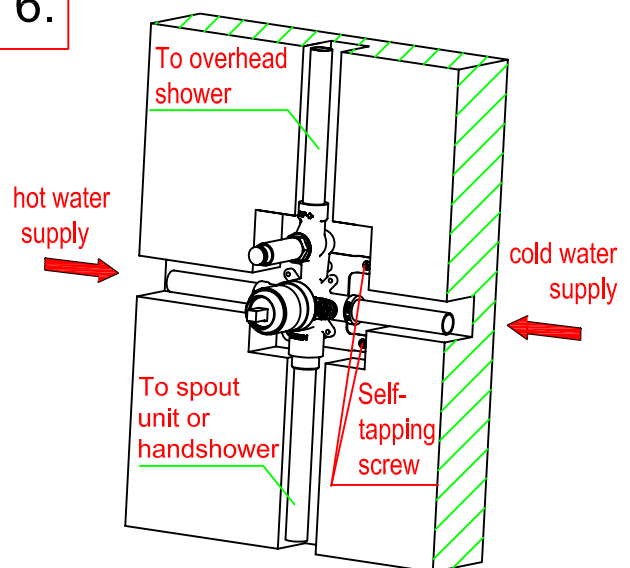

4. Drill 4 holes, and knock the expansion plug inside.

5.

5. Remove the plastic guard A(2). After adjusting the self-tapping screw's position, tighten the main body(1) with self-tapping screws.

6.

6. Connect to the hot and cold water supplies and outlet then test the tightness.
Testing conditions:
At closing position to water test the water supply pipes and main body, water pressure $\leq 1.6\text{MPa}$;
At opening position, to water test the outlet pipes and valve, water pressure $\leq 0.4\text{MPa}$.

7.

7. After ensure the tightness of every joint, put on the plastic guards, the wall should be kept horizontal with the top of plastic guard A(2) after tiling.

8.

8. After remove the plastic guard B(9) and plastic guard C (10), fix the plate(4) and handle(6) to the main body(1) with bolt B(5) and screw (8).

9.

9. Fix overhead shower, spout or handshower to proper position. Test the tightness of all the joints to finish.

※ Operation

☆ How to operate the mixer handle

- 1) Raise the handle lever up for opening water, push down to close;
- 2) Turn the handle lever to the left to increase hot water flow, to the right to lower water temperature.

How to operate the diverter:

- 1) When opening, water firstly comes from spout or handshower.
- 2) Pull the diverter to switch water from spout or handshower to headshower.
- 3) Diverter automatically spring back after water shut-off.

※ Cleaning and Maintenance

☆ To keep the product clean, shining and in good condition, follow the steps as below:

1. Flush with clean water & dry with soft cloth only;
2. If any dirt, clean with soft liquid or transparent glass detergent.
3. Do not use any scrubbing detergent, polisher, sand-cloth, paper tissue or scraper.
4. Do not use acid detergent, indissolvable grain-like detergent or soap.
