Installation Instructions for:

Elkay Electronic Sensor Activated Deck Mounted Lavatory Faucet LKB738C (Battery / AC powered)

Product Specifications

Power: (a) DC - Alkaline AA Batteries (4); (b) AC/DC alternatively
Water Supply pipe size: NPSM 1/2-14
Working Pressure: 2.8 - 213 psi
Ambient Temp. Range: 36°F - 194°F
Sensing Distance: 7/8" - 6-3/4"
Sensing Range Setup: Digital
Response Time: Default 0.3 sec
Off Delay Time: Default 1 sec
Fresh Battery Life Cycle 400,000
Weak Power indicator: Steady Red LED

Sensor Range Setup (Default sensor range is preset at 5-1/2")

NOTE - Do not attempt to take apart faucet to adjust sensing range. Please read the operational instructions carefully before installation.

1. Switch off the cold and hot water fittings. Place the supplied magnet (H) to the left side of the sensor eye and move it closer to the center of the sensor eye and remain for 3-5 seconds. The sensor eye will blink on for setup mode.
2. Remove the magnet. The sensor eye will blink off. Move your hand back and forward slowly to and from the sensor eye. This will activate the scanning process for the sensor eye. Place your hand to the desired range away from the sensor. Place the magnet to left side of the sensor eye and move it closer to the center of the sensor eye and hold it for 5 seconds. The sensor eye will flash a few times. Remove your hand. The new sensor range will be input to the memory system. It's ready to function. (The recommended sensor range is 1/2" before the spout.)
3. Switch on the hot and cold water fittings. Move your hand into the distance setting range to activate the sensor and the indicator will flash once. At the same time water begins to flow. Retract your hand off the sensing range of the sensor and the water will stop. If water delays to stop over 2 seconds after your hand is off the sensing range, please reset the sensor by shortening the sensing distance. After doing so the water stop time will be within 1 second.
